In-car session reporting and feedback	Tyres – Practical check and discuss
17:00 Close	Full recap and Q&A
	Certification issued
	17:00 Close

WHO IS THIS FOR?

This course has been designed for any fleet professional seeking development in all areas of Driver Risk Management and WRRR (Work Related Road Risk).

Managing the risks to employees who drive at work requires more than just compliance with road traffic legislation.

The Health and Safety at Work Act 1974 requires employers to take appropriate steps to ensure the health and safety of their employees and others who may be affected by their activities when at work.

This includes the time when they are driving or riding at work, whether this is in a company or hired vehicle, or in the employee's own vehicle.

There will always be risks associated with driving. Although these cannot be completely controlled, an employer has a responsibility to take all reasonable steps to manage these risks and do everything reasonably practicable to protect people from harm in the same way as they would in the workplace

OUTCOME

Any attendee successfully completing this course will have a greater understanding of Driver Risk Management and WRRR (Work Related Road Risk) and to take these newly acquired skills back into the workplace.

A full and detailed report will be produced post training and certification issued following successful completion.

RED

RED employees have been in the Driver Risk Management Industry since the early 1980's when DRM was in its infancy and have worked within most of the training industries commonly recognised providers at all levels.

The team has evolved with new legislation and technology and is at the forefront of Driver Risk Management, with its clients being some of the largest and diverse fleets in the UK.

RED holds full JAUPT CPC accreditation, ISO9001, ISO27001, ISO14001, OHSAS18001 and is a member of the FTA and FIAG.

RED also holds £10m PL, £10 PI and full fleet policies including provision of driver training.
